HOW TO USE?

1. When you press "START" button, you are ready for the sedan.
2. Please "insert" your paper.
3. When the paper with more capacity is loaded, it will be "automatically reversed".
4. To cut a small piece of paper that cannot be detected by the sensor, press the "Start" button "again" and insert the paper. (The blade starts to rotate automatically and stops automatically after 3 minutes)
5. When the "scrap paper indicator" lights up, it means that the waste container is full, not a malfunction. (Empty the sedan chip in the bin)
6. The operation "stops automatically" when the door is open during the sedan (Safety) (Close the door, press the start button and sedan again)

Safety Devices and Other Features

KOSTAL Shredders are equipped with various safety features:

Automatic Reverse Rotation
When too much paper is inserted, the cutter stops operating and automatically rotates in reverse to discharge the jammed paper. An alarm sounds. Reduce the amount of paper and restart the operation.

Door Switch
If the door is open, the shredder will not operate.
Automatic Stop
When the shredded paper fills the wastebasket, the "FULL" light comes on and the cutter stops operation. Open the door, remove the wastebasket and empty paper scraps. Replace the wastebasket, close the door and continue operation.

Automatic Power Shut-Off
If the shredder operates continuously for more than 30 minutes, the power is automatically shut off.
If the motor is overloaded, the "STOP" LED will flash until it cools down. When the flashing stops the shredder is ready to be used again.

Auto Diagnosis Recording System
Records length of shredding time, number of auto reverse cycles, and quantity of pages shredded. Provides use, or over use, information that can be utilized to determine what size shredder should be in use and shredder misuse information.

Auto Feeder Function (KS-1310AF only)
Push Auto-Feed Hopper Lid and load up to 150sheets of A4paper to be shredded.
Feeder does not accept staples or paper clip.
Paper will automatically feed and be shredded.
Cutting blades will stop after shredding is complete.
Close lid when Auto-Feed Hopper is not in use.

Maintenance

- Disconnect power by pulling power cord plug from wall outlet.
- To clean the exterior, wipe the surface with a soft cloth. If the surface is very dirty, use a neutral detergent, then wipe again with a soft cloth.

Caution

- Never put water directly on the surface of the shredder.
- Never clean the case with benzene or thinner, since it will cause discoloration.
- Do not dismantle the shredder. Contact your KOSTAL Dealer for service.
